### Tree Climbing Risk Assessment

**Activity** Tree Climbing

**What are the hazards?**
- Unauthorized Use
- Vandalism
- Slips, Trips and Falls
- Falls from height
- Items falling from height
- Adverse weather conditions
- Human error, inappropriate use of equipment.
- Ladders slipping
- Rope burns
- Tree impact injuries

**Who is at risk?** Staff, participants and members of the public.

</tbody>
</table>
| Slips trips and falls from debris and equipment under tree| • The area under the tree will be managed to minimise trip hazards, the area will be wood chipped if requested and any branches, roots or other debris will be moved if possible before the session and bushes will be cut back to allow access to the area under the tree but this must be done sympathetically
• Equipment to be laid out neatly as trained and a tidy site managed throughout the activity | LOW        | LOW         |
| Falls from height due to poor instruction                | • Instructors assessed to NPTC Unit 38, Tree climbing and Arial rescue or another qualification approved by CI and Director of Avon Tyrrell
• Qualified instructors refreshed in techniques every 12 months internally and externally 3-5years
• Instructor to follow training                           | LOW        | LOW         |
| Falls from height from faulty equipment | • All equipment check at the time of purchase  
• All equipment check before use, a regularly inspected and recorded on Papertrail  
• All equipment that is questionable in regards to integrity and in line with how the manufacturer recommends it is checks is removed from active use and checked by the SI or the CI or is sent off for an external opinion or is condemned | LOW | LOW |
| Falls from height due to the techniques taught not being understood / forgotten/ human error | • The instructor will provide a clear demonstration of all the required techniques  
• Participants will demonstrate competence before ascending the rope  
• Only the instructor is allowed to remove the ascender  
• At the point of lowering, the instructor on the ground will assist with speed control.  
• Participants are not allowed to climb above the top anchor point  
• There will be a second prussic attach to a rope halo at the base of the tree acting as a back-up if a participant has an issue with their prussic. | LOW | LOW |
| Items falling from height causing injury to the people below the tree | • Everything must be removed from the pockets  
• Shoes must be secured  
• Helmets worn by all people under the branches of the tree  
• All trees used for this session will be inspected annually by an aboriculturist  
• When necessary the tree will be dead wooded  
• When dropping dead wood no one may stand under tree. | LOW | LOW |
| Strong winds causing people to swing into other people and the tree resulting in impact injuries | • Session stopped in high winds at the decision of the instructor based on:  
  o Wind direction  
  o Wind speed  
  o Group  
  o Tree movement  
• After high winds the tree will be checked for damaged | LOW | LOW |
| The ladder slipping leading to injuries from falling from height | • If a ladder is used it must be secured if possible or footed by another instructor on its first use | LOW | LOW |
| Rope burns from releasing the blakes hitch while descending the rope | During the training and demonstration phase of the introduction clients are to be made aware of:  
• How to release the blakes hitch without coming into contact with the main rope  
• Gloves can be provided if required  
• The ground instructor will help control the speed reducing the chance of burns | LOW | LOW |
| Grazes on feet, arms and legs from the tree while climbing | Ropes to be placed to minimize this  
• Recommend trousers and long sleeve tops to be worn  
• Suitable shoes must be worn i.e. trainers, hiking boots, shoes. Not wellington boots, flip flops, open toed sandals etc. | LOW | LOW |
| Impact injuries from swinging on the rope and or branch walking | These activities are only to be allowed if the group are deemed competent by the instructor  
• Advise and training provided about the pros and cons of rope swinging and branch walking | LOW | LOW |
